WYETH'S LIQUID MALT EXTRACT.

*Containing all the nutrient Properties
of Malt, with the least possible
amount of Alcohol.*

We claim that our Liquid Malt Extract will be found to contain all the nutritive virtues of the best malt liquors in a higher degree than any of the largely sold liquid malts, with which we have compared it, while it is free from the stimulating effect, which invariably follows their administration.

This is not a beverage, but a most agreeable and valuable nutrient, tonic and digestive agent, containing a large amount of nutritious extractive matter and the smallest percentage of alcohol (less than three per cent.) found in any liquid preparation of malt. Since the introduction of this preparation to the medical profession, about four years ago, it has steadily grown in favor, and those who have given the subject of malt extracts, the most careful study and investigation, are unanimous in endorsing all the claims we have made for it.

It is especially adapted for administration to nursing mothers, and children, to patients suffering from nervous exhaustion, chilliness, etc., and, particularly, to those unable to digest starchy food.

COMPRESSED

TABLET TRITURATES.

Combining absolute accuracy of dose, convenience in administration, speedy disintegration, and consequent rapid absorption, thereby insuring the most effective results.

We feel confident that few physicians will prescribe any of the more powerful remedies, such as Aconite, Morphine, Digitalis, Arsenic, etc., either in powders or in solutions, when fully aware of the advantages presented by our Triturates, their accuracy and convenience in administration, coupled with the absolute freedom from danger in prescribing, always attending to a greater or less extent, the dispensing of dangerous drugs, in the form of powders, drops, or large doses in solutions.

FLUID EXTRACT OF ERGOT.

No article in the *Materia Medica* has so often disappointed the practitioner as Ergot, and scarcely any drug is more susceptible of change, deterioration, and in time to become entirely inert. We hesitated to ask the unconditional endorsement of the Profession, until we had fully demonstrated for ourselves the value of the Fluid Extract we make; but now, after ten years' continued evidence of its successful use in the hands of medical men throughout the country, during which time we have manufactured many thousands of pounds, we confidently claim for it a value and efficacy superior to any preparations of this drug.

The menstruum used is that best adapted for extracting all the active matter, and retaining its full power. Each minim represents one grain of the freshly powdered drug. Our Fluid Extract is entirely free from acid, and can be used subcutaneously without irritation, having in this respect a great advantage over the watery solutions, which decompose very rapidly. It will give us pleasure to send samples to any member of the Profession who may desire to test its value, or confirm its representations, by experiment in private practice, or in institutions with which he may be connected.

WE ALSO MANUFACTURE A FULL LINE OF
ELIXIRS, SYRUPS, WINES,
PURE AND SACCHARATED PEPSIN,
MEDICINAL FLUID EXTRACTS,
BUTTER OF CACAO SUPPOSITORIES,
LIQUORS,
PREPARATIONS OF COD LIVER OIL,
